

Pediatric Partners, S.C.  
Flu Vaccine

Patient Name \_\_\_\_\_ Date of Birth \_\_\_\_\_

Children 6 months through 8 years old (i.e., under 9 years old) require 2 doses of Influenza Vaccine administered a minimum of 4 weeks apart during their first season of vaccination.

Both offices will have Flumist™ (the nasal spray) as well as the injectable form of the flu vaccine available. Flumist™ is only approved for healthy children 2 years of age and older. In order to expedite the flu clinics, please clearly circle one answer to the following questions **about the patient**. Flu clinics are performed by the nurses; therefore, if you would like to see a provider, please ask the receptionist about availability.

1. Are you allergic to eggs, gentamicin, gelatin, or arginine? Y / N
2. Do you have any problems with your immune system? Y / N
3. Do you have AIDS, HIV, cancer, or have you had an organ transplant? Y / N
4. Did a doctor ever tell you that you had asthma or reactive airway disease? Y / N
5. Do you have any disease of the lungs like cystic fibrosis? Y / N
6. Did you ever have Guillain-Barre Syndrome or active neurological disease? Y / N
7. Do you have kidney/liver disease? Y / N
8. Is there a chance you could be pregnant? Y / N
9. Do you have heart disease? Y / N
10. Do you have a blood disease like sickle cell disease or thalassemia? Y / N
11. Do you currently have a cold or other respiratory illness? Y / N
12. Do you have a fever or a very stuffy nose? Y / N
13. Do you have a muscle or nerve disorder (i.e. seizures/cerebral palsy)? Y / N
14. Are you taking aspirin? Y / N
15. Does anyone living with you have a compromised immune system? Y / N
16. Do you have diabetes or other metabolic disease? Y / N
17. Have you ever had the seasonal flu vaccine? Y / N
18. Have you ever had the H1N1 flu vaccine? Y / N

Signature of parent or guardian \_\_\_\_\_

Parents-Due to the limited availability of the flu vaccine, please contact your primary care physician for the flu vaccine.
